

2 x 3 (two against three)

♩ = 100

Tap the top notes (quarter notes) with your right hand on a hard surface and the bottom notes with your left on something soft.

When you reach the dotted quarter notes, you might think, “Cute kitty cat.”

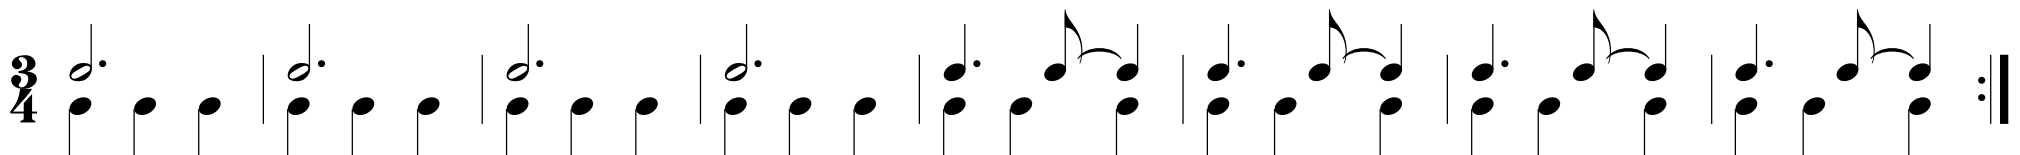

Repeat at least three times.

When you have mastered the example at the top of the page, perform the same rhythm but reverse your hands. (See below.)

Your left hand taps quarter notes on a soft surface and your right hand taps the top notes on something hard.

Repeat at least thrice.

♩ = 100

Ask me about walking in a cross rhythm.
